Dear Parents and Carers,

During the week of 18th- 22nd November the children will be involved in a range of Science, Technology, Engineering and Maths sessions which we refer to as STEM.

This will be a special week where we aim to expand the aspirations of the children and open their minds to ways in which STEM subjects are invaluable tools for future innovation and creativity within the world we live in today.

**We are looking for help from you.**

Do you have a profession which is based in either Science, Technology, Engineering or Maths? Do you have a passion for what you do? If so, we need you! Whether you are a mechanic, dietitian, accountant, doctor, nurse, heating engineer, software programmer, electrical engineer or have any other STEM related career we would be keen to hear from you.

We would love it if parents or family members, who have a career within STEM, could visit on **Friday 22nd November at 1:45pm for 1 hour to give a 5 minute talk** to a small group of children about what they do and why it is so great. Hopefully it will inspire children to consider these as future careers for themselves.

We would be very grateful to any parents or family members that can help us with this element of our STEM week and look forward to speaking with you. If you do have something to offer, please complete and return the reply slip so that we can contact you.

Thank you for continued support,

*N Harding*

Mrs N. Harding  
*Science Lead Teacher*
